The state-of-practice in requirements specification: an extended interview study at 12 companies.

Published in: Requirements Engineering, Sep2023, Academic Search Complete
By: Franch, Xavier; Palomares, Cristina; Quer, Carme; Chatzipetrou, Panagiota; Gorschek, Tony

Requirements specification is a core activity in the requirements engineering phase of a software development project. Researchers have contributed extensively to the field of requirements specification, but the extent to which their proposals have been adopted in practice remains unclear. We gathered evidence about the state of practice in requirements specification by focussing on the artefacts used in this activity, the application of templates or guidelines, how requirements are structured in the specification document, what tools practitioners use to specify requirements, and what challenges they face. We conducted an interview-based survey study involving 24 practitioners from 12 different Swedish IT companies. We recorded the interviews and analysed these recordings, primarily by using qualitative methods. Natural language constitutes the main specification artefact but is usually accompanied by some other type of instrument. Most requirements specifications use templates or guidelines, although they seldom follow any fixed standard. Requirements are always structured in the document according to the main functionalities of the system or to project areas or system parts. Different types of tools, including MS Office tools, are used, either individually or combined, in the compilation of requirements specifications. We also note that challenges related to the use of natural language (dealing with ambiguity,

I progetti ti consentono di raccogliere e organizzare gli elementi trovati come libri e articoli. Per esempio, se tu stai lavorando a diversi progetti di ricerca, puoi creare un progetto per ciascuno nel quale salvare gli articoli sui diversi argomenti. Inoltre puoi assegnare a ciascun progetto una data di scadenza per dare delle priorità al tuo lavoro. Clicca su **New project** per iniziare.
